## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10 May 2007 has been entered.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 94-113 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The "filter membrane" is not disclosed in the specification. The term "membrane" never appears in the specification to be enabling to one of ordinary skill in the art.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 94-113 are rejected under 35 U.S.C. 102(b) as being anticipated by Gelbfish (US 5,800,457).

Gelbfish teaches an embolic filter is a central region (formed between the edge 158 and the web 166), with a plurality of openings (space between struts 150), and a filter edge (158) with peaks and valleys of different heights/depths (Figs 9 and 10).

***Response to Arguments***

3. Applicant's arguments are moot in view of the new grounds of rejection. Without the new matter, the claims are identical to the claims submitted 11 December 2006. See response to arguments of the final rejection mailed 2/16/07 and Advisory action mailed 4/27/07
